BUSINESS DOESN'T ALWAYS WORK OUT AS EXPECTED:

So you started out in business with a clear vision and a truckload of determination, passion and belief.... only to find out that business isn't always what it's cracked up to be! You may have found that internal & external challenges are consuming all of your time, are never-ending & are constantly nagging you & testing your confidence and belief in the business journey you are on.

Karkarook.Co shape and strengthen business foundations to increase your competitive advantage, grow your profit margin & support sustainable growth in any economy.

When you are working IN and not ON your business, seeing it objectively & strategically, from a 'balcony view', isn't always possible. This can obscure the ability to continually scan the business environment to identify disruptive changes (problems) & the take-off of new opportunities. This leads to operational and business process inefficiencies that impact your bottom line. Did you know that 20-30% of small business revenue is lost due to inefficient processes?

My name is Emma Eckermann. I understand, through experience, the trials and tribulations of operating and growing a small business. I am a giver of information and resources that help solve problems and inspire those who need it! I enjoy helping business owners build on their capabilities and confidence using an authentic, personalised and hands-on approach that assists in transforming small business .

ELEVATE YOUR BUSINESS PERFORMANCE:

I will help draw out new levels of performance by identifying & rectifying process inefficiencies that will increase your profit margin & better position your business within your market segment. Utilising a solid strategic thinking approach, I will develop & map customised, visible, repeatable processes to expedite the delivery of sustainable growth. You CAN create and have the business you want & by partnering with Karkarook.Co you can get there quicker!

"If your business depends on you, you don't own a business - you have a job" Michael E Gerber
